TOWN NEWS.

LYNDON CENTER.

Miss Blva Kimball is visiting her sister Mrs. Carrie K. Dresser, at Berlin. Mrs. William Bradley is entertaining

her sister, Mrs. Barron, of Quechee. Mr. and Mrs. E. M. Campbell have been spending a few days with relatives

Prof. J. H. Fuller was called to Windsor Saturday on account of the serious illness of his father, Rev. J. K. Fuller. Richard White and Miss Mary Blake were married by Rev. C. E. Tedford at

Lyman Randall's last Wednesday. The Free Baptist Ladies' Aid meet at the home of Mrs. E. J. Quimby Friday

Luther Hatch, principal of the grammar school has gone to his home in Everett, Mass., to spend his vacation. Miss Mabel Hamilton of Newport has again been engaged for the elocution

work at the Institute and commenced work this week. Br. Bull's Cough Syrup is a . peedy and efficacious cure for croup, whooping cough and bronchitis, No child should

be left to suffer the tortures of these ailments, when parents can get this wonderful remedy for only 25 cts.

WEST CONCORD.

All will enjoy the mild weather we have had the past few days as we have had such severe weather for so long. The roads were dritted very badly last week. Rev. Mr. Lance of Cabot who preached in the Methodist church a week ago also supplied last Sunday, preaching an excellent sermon.

The sick ones here are improving yet the doctors are kept very busy. Mrs. Morehouse and son who are

boarding at C. L. Stacy's and have been very sick with the measles are better. H. H. May's little daughter is now ill. M. L. Reed has been confined to the

house the past week by a severe cold. Ten men are employed at the granite sheds which speaks well for the business as it has been started such a short time. Mrs. J. B. Woodbury, formerly of this tows, died at Holliston, Mass., Sunday and the funeral was held their Wednesday. She will be well and pleasantly remembered here.

To accomodate those who are partial to the use of atomizers in applying liquids into the nasal passages for catarrhal troubles, the proprietors prepare Ely's Liquid Cream Balm. Price including the spraying tube is 75 cents. Druggists or by mail. The liquid embodies the medicinal properties of the solid preparation. Cream Balm is quickly absorbed by the membrane and does not dry up the secretion, but changes them to a natural and healthy character. Ely Brothers, 56 Warren St., N. Y.

EAST CONCORD.

Almost everybody in and about the village have the prevailing distemper, the grip, and two old ladies, Mrs. Kiser and Mrs. Marian Higgins are dangerously sick with it in the same house. Mrs. Emily Quimby of West Concord is caring

Alred Briggs, while at work for C. D. Root in the mill last week, got the fingers of his left hand too near the board saw while it was in motion and came near losing his fingers. He will have to lay off several days before he can work

Scott Ranney had a two days sale of clothing and gents furnishing goods at

lames Fisher's store last week There is a sad case of neglect and abuse to the dumb brute in the north part of this neighborhood. Seven or eight head of cattle do not get anything to eat oftentimes for two days at a time. One yearing has starved to death and the other stock is hardly alive. The poor cattle are tied up in a cold barn without sufficient food to eat or drink and unless there is different proceedings in this case whole affair.

Hany School Children are Sickly. Mother Gray's Sweet Powders for Children, used by Mother Grav, a nurse in Children's Home, New York, Break up colds in 24 hours, cure Feverishness, Headache, Stomach Troubles, Teething Disorders, and Destroy Worms. At all druggists, 25c. Sample mailed FREE. Address Allen S. Olmstead, Leroy, N. Y.

SOUTH WHEELOCK.

The storm of last week blockaded some of the back roads, especially the mountain road. Four men worked shoveling Sunday and then it was doubtful if this opened the road for

Mrs. Orin Snelling was called to Hardwick this week to care for her daughter, Bertha, who is very sick with measles.

Last Thursday morning the house owned by John Barclay and known as the Thomas Flood place was burned to the ground, the tenants barely escaping and only in their night clothes, as it burned between two and three o'clock. Cause unknown. The tenants are very poor people and have the sympathy of the people as they lost all they had.

Hoyt have been cutting ice at Bean Pond. They report it of the best quality. The Park boys with their sawing ma-

C. G. and W. M. Mooney and C. A.

chine are sawing wood at C.G. Mooney's

Thomas Hall is drawing quite a num-ber of logs to the mill for Nathaniel Ward of St. Johnsbury, from his land in

South Wheelock. The ladies have a social at M. M. Keough's Saturday afternoon and even-

Bucklen's Arnica Salve

Has world wide fame for marvellous

cures. It surpasses any other salve, lotion, ointment or balm for Cuts, Corns, Burns, Boils, Sores, Felons, Ulcers, Tetter, Salt Rheum, Fever Sores, Chapped Hands, Skin Eruptions; Infallible for Piles. Cure guaranteed. Only 25c at Flint Bros.

WEST BURKE. A farmer's meeting will be held in the Town Hall, Tuesday, Feb. 26, with the following programme:

Welcome.

30 Pood for the Dairy Cow, to Buy or Ratee.
How Briest Hitchcock, Pittsford. 1.15 Gardens.
CARL S. HOPKINS, Brattleboro.
2.00 Type of the Dairy Cow.
HON. GEO. AITKEN, Woodstock
3.00 Tuberculosis,
C. L. BELL, Walden.

7.30 Dairying on Small Farms, 8.16 Grass and Busilage,
D. H. Morse, Randolph.

Earle McAllister of D. at J. E. Woodward's.

The Lecture Course Concert by the Al. bion Male Quartette was a great success-The Albions were assisted by Mrs. Elizabeth de Barrie Gill, who was one of the best readers ever heard here. The arena scene from Quo Vadis was the most difficult selection she gave and in this she proved her mastery of her profession as the audience were held almost spellbound from first to last. The quartette were unfortunate in having one of their members so ill as to require a substitute but their singing was nevertheless much

Mrs, Alice Walter Norris has been very ill with grip for the past week.

The Old Maids' Convention was presented in Music Hall Thursday evening. The ridiculousness of the old maids was very laughable and was truly a farce from the beginning to the end. There was a fair sized audience. The conven-tion convened again at East Burke this week Tuesday evening. Several large loads went up to Burke from here.

Frank Silsby and wife are to remain in Providence until warmer weather. Mr. Silaby is reported to be gaining although very slowly.

Miss Susan Cunningham went to Springfield, Mass, Tuesday, to be absent in that city and in Boston for several

Misses Blanche and Myra Conner entertained a large party of friends very pleasantly Saturday evening.

Miss Florence Brown, who is teaching school at St. Johnsbury Center spent Saturday and Sunday with friends here. Mrs. Cora Stebbins of St. Johnsbury spent a few days with her parents here last week. Her father, Richard Jenness, has been quite ill.

Harry Robie of Rutland has been spending a few days at his old home. A lew from this place went to St. Johns-

bury Friday evening to hear Ernest Seton-Thompson's lecture. Mr. and Mrs. B. U. Wells have returned from their southern trip. They spent

several days on their return at Westfield, Mrs. Geo. Randall has been visiting her sister, Mrs. Frank Gordon at Spring-

field, Mass. Dan Stern was in New York last week on business.

The Village Improvement Society are dvertising the annual Masquerade Ball for Washington's Birthday evening A costumer from Boston will be at Webb's Hotel Thursday and Friday to provide costumes for those who wish to hire

Working Overtime.

Eight hour laws are ignored by those tireless little workers-Dr. King's New Life Pills. Millions are always at work, night and day, curing Indigestion, Biliousness, Constipation, Sick Headache and all Stomach, Liver and Bowel troubles. Easy, pleasant, safe, sure. Only 25c at Flint Bros. drug store.

NORTH DANVILLE.

Death of Mrs. Peter Gadapec. The community was saddened Sunday morning by the death of Mary Paquin, wife of Peter Gadapee. Although Mrs. Gadapee had been in failing health for several months, no one thought the end so near. She was the mother of a large tamily of children, 12 of whom are now living: Trefley, Fred, Lewis, Charles, William, John and Georgie; the daughters are Clara Martin, Carrie Hall, and Lilla, Lettie and Martha Gadapee. She was a kind and indulgent wife and mother and will be greatly missed, especially in the home, as she was a home woman. The funeral services were held from her late home Tuesday, at 8 p. m., Rev. J. D. Waldron officiating. Her age was about 60 years.

Mrs. C. W. Shaw and daughter Katie returned Monday from a week's visit to Mrs. Shaw's daughter, Mrs. Philip

Gobie, of Lebanon. Mr. and Mrs. Martin Sanborn of Wolthe authorities will take charge of the cott spent a few days at his father's, C.

H. Sanborn, the first of the week. C. H. Sanborn was confined to the house by illness the past week.

Mrs. F. W. Green has been quite ill for a few days, but is now convalescent. B. G. Varnum has been housed with the grip for a week.

There will be a phonographic entertainment under the auspices of the Ladies' Aid, at the church, Wednesday evening, Feb. 27, tollowed by a farmer's supper in the vestry. Whole bill, 15

The Christian Endeavor Society will give a sugar party and literary entertainment on the evening of Feb. 22, at the church.

last summer and their mother has been kindly cared for. Additional items on page 6.

What Shall We Have for Dessert? This question arises in the family every Let us answer it to-day. Try Jell-O. a delicious and healthful desert. Preared in two minutes. No boiling! no baking! add boiling water and set to cool. Flavors:—Lemon, orange, raspberry and strawberry. At your grocers,

SOUTH CABOT.

Several from this place attended the Rathbone sale at Marshfield Friday Miss Verna Scribner of Calais visited at V. D. Blake's Sunday.

Miss Gladys Blake is visiting her aunt, Mrs. Frank Walbridge in Cabot. Mr. and Mrs. C. B. Bouldry were called to South Walden Sunday by the severe illness of her sister, Mrs. E. W. Eddy.

Harley Hanscom is visiting his grandparents in Peacham. Mrs. Ella R. Scribner is visiting in

Calais. Earle McAllister of Danville is stopping

The many patrons of the stage route will be pleased to know that Dan Lowell will drive the stage the coming four years. Mr. Lowell has been a very popular stage driver and has won many friends the past four years.

Mrs. Idella Morrison, who has been at J. N. Sargeant's for some time, has gone to West Danville. Mr. and Mrs. Charles Thresher visited

their daughter, Mrs. Robinson, at Burke last week.

The regular monthly meeting of the G. . R. was held at Nelson Bailey's last Saturday. About 15 veterans were present also 15 of the W. R. C. Dinner was

Mrs. Charles Lamb of Montpelier and Will Peak and daughter of Wheelock visited at Albert Peak's last week.

Mr. and Mrs. Will Lackie spent Sunday at Jefferson Hill, Newbury. Nat Trussell is home from Walden where he has been working at Ordway's

mill the past two months. John Wilson and family have moved to Harvey Dunn's farm in the edge of Ryegate.

Mrs. Mero Renfrew of Craftsbury visited her sister, Mrs. Eliza Renfrew, the past week.

The annual farmers meeting at the town hall last Friday, which was con-ducted by the State Board of Agriculture was quite well attended in spite of the storm and was much enjoyed by all. The speakers were all good, but the address by Col. J. H. Brigham, assistant secretary of agriculture at Washington, deserves special mention, as it was very much enjoyed by all. So was also the song "Asleep in the Deep" by Arthur Stoddard.

Miss Olie Moore closed a very success ul term of school last week and the following scholars had no absent marks during the term: Katherine Hooker, Ellen Kinerson, Sarah Lawton, Gertie Balau, Benjamin Field and Carroll Blanchard. Louise Blanchard was absent only one-half day. Katherine Hooker, Carroll Blanchard and Sarah Lawton were not absent during the year.

Harvey Wheeler cut his foot very badly one day recently while chopping in the the woods. He is getting along as well as can be expected.

Nellie M. Harvey goes to Barnet Center this week Friday night to read at an

Varnish Makes Devoe's Varnish. Floor Paint cost 5c. more a quart; makes it look brighter and wear fully twice as long as cheaper floor paints. Sold by Flint Bros.

RYEGATE.

The state board of agriculture held very interesting and profitable meetings the United Presbyterian church Feb. 14 and 15. Six speakers from abroad were present and the sessions were well attended. A public dinner was served in the vestry to over 100 persons

E. E. Symes went to Boston Monday in the interest of Jersey Hill creamery. Rev. F. Collins is one of the late victims of grip, being unable to supply the pulpit on Sunday. In his absence a sermon was read by S. C. Gibson.

L. P. Leach and wife of St. Johnsbury Mrs. James Doe has left the farm and gone to live with her son, George, at Tousham.

Miss Mame Coder of Iowa, who has been visiting ber sister, Mrs. Harry Nelson for the past eight months, finished her school in District No. 2 last week and returns to Iowa this week.

The Ladies Missionary Society meets with Mrs. W. T. McLam, Thursday afternoon. Mrs. L. H. Vitty of White River Junction visited at Mrs. W. F. Gibson's the

first of the week. To Cure a Cold in One Day Take Laxative Bromo Quinine Tablets. All druggists refund the money if it fails to cure. E. W. Grove's signature on

every box. 25 cents.

MCINDOE FALLS. C. D. Howe, Mr. and Mrs. C. I. Smith, Dr. and Mrs. H. C. Ide, Miss Mabel Ford, and Miss Martha Gleason attended the lecture given by Ernest Seton-Thompson at St. Johnsbury at St. Johnsbury Friday evening.

Rev. I. C. Brown of Monroe supplied the pulpit last Sunday morning.

Bert Drew was in town recently. Mrs. and Mrs. Walter Phelps, son Harvey and daughter, Mr. and Mrs. G. F. Winch, Miss Daisy McFarland, Miss Pearl Field and the Misses Inez and Jean Duncan, Mr. and Mrs. Ora Bishop attended the play "Way Down East" at St. Johnsbury Monday evening.

Mrs. Eri Chamberlain has returned from Hartford, Ct., where she has been spending the winter with her daughter, Mrs. Collins.

The Academy students will give an entertainment in the hall Friday evening. Feb. 22nd, consisting of recitations readings and music followed by a farce entitled: "Gumtown Woman's Association." Cast of characters:

Miss Jane Jalap,

" Sally Slim,
" Polly Plum,
" Annie Scaton,
Mrs. Lucinda Lobbs, Mary Prazer Myrtie Skinner Margaret Gleason Grace Hunt Emma Crane " Betsy Bounce, Mr. John Lobbs, Mr. Gustavus Wellington, Lottie Roy Lloyd Murray John Aiken

The entertainment will be followed by a promenade for which McIndoes Orches tra will furnish music. This will be the final entertainment of the senior class for the purpose of raising money for graduating expenses. A substantial increase of the amount already raised is desired, and liberal patronage by all is asked. Admission fifteen cents. Supper twenty cents per plate.

Stops the Cough and works off the Cold. Laxative Bromo-Quinine Tablets cure a

cold in one day. No cure, no pay. Price PASSURIPSIC.

The social given by the village improvement society Thursday evening was largely attended and a very pleasant time was enjoyed, as well as a good amount of money added to the treasury of the society. It is intended to have the concert by

the choir and others on Wednesday evening, Feb. 27. We hope for a large pat-ronage for this concert. There will be choruses, quartettes, songs, etc., and it is believed it will be enjoyed by all who will attend. Proceeds will be for the purpose of purchasing new books and

other supplies for the choir. Next rehearsal for the concert Thursday evening Feb. 21. All of the singers take note. Mrs. Frank Davis remains much the

same as for a week past. She is now under the care of a trained nurse. Bert Gates and Mrs. Ed. Hill are upon the sick list.

Paint your buggy for 75 cents

with Devoe's Gloss Carriage Paint, ready for use; 10 colors. Gives a high gloss equal to new. Sold by Flint Bros.

Too Much Club Life. It would be hard to tell which is worse, a dun or a crying baby. One of the latter on a crowded street car raised sheol. A poor, dispirited, sad faced man held it with its red face wabbling over his shoulder and its feet occasionally beating the air as it renewed its pathetic screams. The women glared at him. "No wonder it eries," said one. "See how that idiot is holding it." The old married man longed to give him a word or two about carrying a child on the public cars. The bachelor swore under his breath and said something about nulsances on street cars and forcing people to quit after paying their fares. Meanwhile the baby screamed louder than ever, and the poor father was wild. He saw the looks on the faces around him. He knew exactly what those folks were thinking. Finally he said, with a tremble in his voice, "Ladies and gentlemen, you must excuse this baby, but its mother"- Tears stole down his haggard face. "Oh, the poor little thing," interrupted the old maid in the corner sweetly. "Let me

hold the little angel." The old bachelor turned hastily aside and wiped a tear which had given his eye a surprise party, and the married man coughed and felt a strange lump in his throat. "It's mother," continued the baby holder, "is attending the business meetings of 16 of her clubs today."-Louisville Times,

Father Time's Old Clock. "The transmitting clock at the Naval observatory, Washington, is the absolute monarch of American timekeepers," writes Evander McIver Sweet in The Ladies' Home Journal. "Every day in the year except Sunday by one pendulum stroke it speaks directly and instantaneously to every city and considerable town between the peaks of the Rockies and the pines of Maine, saying to them that on the seventy-fifth meridian it is now high noon to the fraction of a second. A duplicate mechanism stationed at the branch naval observatory on Mare Island performs a similar service for the people of the Pacific slope. And by this one clock at the national capital, together with its duplicate on the Pacific, is set nearly every timepiece in the United States and Cu-

on the border of Canada. "A number of clocks-from 3 to 3,000 are wired together into a local family gas element. and by means of a switch key at the Unless the farmer can bring into visited at W. T. McLam's last Thursday. telegraph office are put into direct con- active form the great store of potash tact with the parent clock at the na- in his soil he will then have to buy the every clock in the circuit, whether it be leans, begins a new day in perfect accord with its mechanical deity."

Dry Goods Coopers.

"This is a strange place for a cooper shop," said a stranger in New York, pointing to a sign over a basement in

the wholesale dry goods district. "Yes; it would be a queer place," was the answer, "if the product was like that of nearly all cooper shops. But there was never a barrel made in the place, and probably not one of the 15 men who work there could head a barrel, to say nothing of making one. This cooperage does business only with big

wholesale houses." There are several similar shops in the district. They make a business of strapping cases of merchandise after they have been packed. The large concerns have the cases put in the street after they have been packed, and then the cooper is sent for to nail the wooden straps around them. He receives about 25 cents an hour for his labor and from 15 to 25 cents a pair for the straps. The shops are the storehouses for the hoop poles, and there the men split and shave the hickory saplings which finally become the case straps. There are some houses in the district where the porter does this work, but the large concerns turn it over to the coopers who never make a barrel.-New York Tribune.

Early Spring Cabbage.

Regarding early spring cabbage a Long Island grower writes: "There is an increasing demand for this cabbage, and it must therefore give satisfaction, but to me it does not seem to justify the claims made for it. I do not find it as early as the Wakefield, as some claim. In fact, with me it shows about the same season of maturity as our second early sorts, early summer and others of this class. It is a very good stock and heads well with us, and from the fact that the demand seems rather to increase I presume it has come to stay for a time at least."-Gardening.

A Sergeant's Surprise.

"When Indians were being recruited for the regular army," said a western representative, "It was the custom to give them civilized names. Down at Fort Apache army officers were recruiting Yumas and Apaches. A recruiting sergeant was naming them. Finally a company had been formed, and the first sergeant, who was an American, went out to the front and center to report his company to the commanding officer. "'Company D, sir, four privates ab-

"'Who are they?' asked the commanding officer. "'Jay Gould, Cornelius Vanderbilt, Joe Jefferson and Russell Sage, sir,' shouted the sergeant."

gent.'

AGRICULTURAL.

Commercial Fertilizers.

The leading kinds of fertilizers are classified and described as follows by Professor Kedzle of the Michigan station:

First.-Complete manure, which contains nitrogen in some combination, such as a salt of ammonia, nitrate of soda or organic nitrogen; potash, as murlate or sulphate (German stassfurth salts) or wood ashes; phosphoric acid, as a sulphate of lime. It is called a complete manure because it contains all of the three materials most essential for plant growth and most likely to be

deficient in a field after long cropping. Second.-Plain phosphate, which may be in the form of superphosphate, soluble in water or solution of citrate of ammonia, these being called available because they are readily taken up by the roots of plants, and ground phosphate rock, an insoluble form. The bone phosphate and rock phosphate are changed into superphosphate by the action of sulphuric acid, removing a part of the lime as sulphate. The soluble phosphate is especially beneficial to plants in the early state of their growth, giving them a good start. In later stages of growth, when the plant by its roots can forage for food in the soil, the insoluble phosphate may have nearly as beneficial an effect.

Third.-Phosphates promote the formation of flowers and fruit and secure earlier ripening. They may be wisely used on vines and succulent fruits that are liable to be cut by early frosts in autumn, securing early crops with better prices and avoiding the loss of the entire crop by untimely frosts before most of the crop had ripened. Fruit trees sometimes blossom year after year without producing fruit. This is often caused by storms at the flowering period, but it may be caused by constitutional weakness, in consequence of which pollen of vital power is not formed. In such cases the use of active phosphates is worthy of trial.

Bonemeal contains phosphate of lime and animal matter rich in nitrogen and hence is very valuable for manure where we desire a prolonged influence. It is well adapted to grass lands and is free from the bad odors often given off by mixed fertilizers. Moist meadows are benefited by a dressing of bonemeal. If the bones that now adorn the back yard and pasture lot should be ground into a powder and scattered on a crop worn field, the results would surprise some farm-

Fourth.-Potash manure. The best and cheapest is that neglected home product, wood ashes. These contain an average of 5 per cent of potash, besides a sensible amount of phosphate ba, most of those in Mexico and many | and a very large amount of carbonate of lime and magnesia. They are an all around plant manure so far as mineral -in nearly every city and large town matter is concerned, supplying each

tional capital. So that the instant the German potash salts, the muriate or electric touch is given from Washington sulphate. These salts are yearly coming into greater prominence as potash at Boston, Minneapolis or New Or- fertilizers, but their sale in Michigan in separate form has not been large.

The influence of potash on plant life

is masterful; no plant can grow with-

out it, and its influence in developing

the carbohydrates and maturing fruits is marked and apparently controlling. Fifth.-Nitrogen compounds. Nitrogen is the bottled wine of the vegetable feast. If the term stimulant can be applied to any organization destitute of a nervous system, then nitrogen is the stimulant of plant life. In any of its combined forms it gives depth of color and exuberance of growth to vegetable life, and when in abundant supply it causes the plant to break forth into riotous growth. The great reservoir of nitrogen is the air, but the leaves of plants, though constantly bathed in nitrogen, cannot drink in a particle. It is only nitrogen in combination that can be appropriat-

amount is not large and entirely inadequate to supply a crop. A large amount of active nitrogen in the form of nitrates is yearly formed in every well cultivated field, and this is the chenpest way of securing a supply of this costllest element of plant growth. The raising of leguminous crops, like the clovers, is the next

ed by the plant, and this enters the

plant by the roots and comes from the

soil. A small amount is brought to the

soil by the rain, washing out the am-

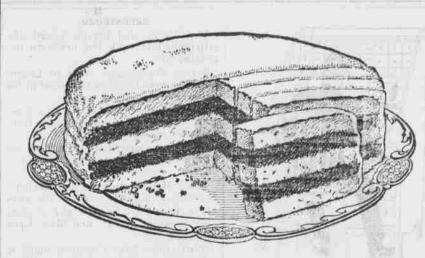

monia and nitrates of the air, but the

cheapest way of securing a supply. Combined nitrogen is purchased in three forms-salts of ammonia, nitrate of soda and organic nitrogen in the form of dried blood, fish scraps, cottonseed meal, etc.

Sixth.-Tankage is a complex and variable material obtained from the waste residues at the slaughter houses, the garbage collected by the scavengers in cities, etc. These materials are dried, the grease extracted in tanks, and this tankage, by itself or mixed with phosphates, potash, etc., is sold as a fertilizer. It is mainly used to give bulk to the concentrated fertilizers made from bone and rock phosphate.

Death from using Fertilizer. In view of the general use of bone dust

as a tertilizer by farmers and gardeners, the following case of anthrax is of interest. Anthrax is a very tatal disease due to a special bacterium It usually occurs in animals, chiefly cattle; but some times the germ gains entrance into the human body, and almost invariably causes death. Owing to the trades in which it usually occurs, it is commonly known as wool sorters' or rag pickers' disease. This man was a farmer, who had some slight eruption on the chest, which he frequently scratched. For two weeks before his death he had been engaged in sowing different kinds of grain along with artificial manure in the shape of bone dust, his hands, of course, were covered with the latter, and he frequently used them for scratching. In a few days he noticed a small pimple. This

At this season the housekeeper must look specially after the baking powder.

As she cannot make good cake with bad eggs, no more can she make cake that is light, delicious and dainty with inferior baking powder.

Royal Baking Powder is indispensable for the preparation of the finest food. It imparts that peculiar lightness, sweetness and flavor noticed in the finest cake, biscuit, doughnuts, crusts, etc., which expert bakers say is unobtainable by the use of any other leavening agent.

The "Royal Baker and Pastry Cook "—containing over Soo most practical and valuable cooking re-ceipts—free to every patron. Send postal card with your full address.

There are cheap baking powders made from aium, but they are ex-ceedingly harmful to health. Their astringent and enuterizing qualities add a dangerous element to food.

ROYAL BAKING POWDER CO., 100 WILLIAM ST., NEW YORK.

gradually grew larger and became swollen and inflamed. The skin grew darker, being almost black in patches; his face was dusky and livid; he suffered greatly from difficulty of breathing and died four days after the onset of the disca e. The physician who had charge of the case, after a careful examination of possible sources of infection, concluded that the man had intected himself by scratching some of the bone dust into the skin on his chest. The obvious moral to be drawn is that great care should be used in handling artificial manures, and that special precaution should be taken when there is an open sore or cut on any portion of the body likely to be brought in contact with the fertilizer.

The Right Time to Let Bees Alone Early Spring Inspection.

About the only attention that bees at the north require now is to let them strictly alone, as A. H. Duff advises in Kansas Farmer: See that no stock gets near the hives and that the apiary is in perfect solitude. Do not now try to accomplish any work that you may have neglected to do in the fall unless it be that you erect some kind of a windbreak far enough from the hives that the bees do not have any knowledge of it.

Bees of course are active during a warm day and if warm enough will come out and take a flight. This is a good thing for them, as by frequent flights during winter they keep in the best of health. There is no cause for alarm from bees not wintering well in a winter like the present one. We will find when the proper times comes to examine them, which is early in March, if the weather is favorable that they have not drawn heavily on their stores and consequently have plenty of honey for spring use if they had a good sup-

ply in autumn. While it is safe to open hives and examine bees any day they are flying freely, yet from the 1st of January until the 1st of March I would not open the hives, for we cannot close them again so well as they were before opening them, and bad effects may result. March is the proper time to look after the welfare of the bees, and in this latitude we may do the work early in this month if the weather is suitable, but not otherwise. If a fine spell of weather does not present itself during March from March 1. so that the bees can take a good fly better wait until it comes, even if a month later.

When the right time comes, do not put it off until tomorrow, but do the work that day. In earlier days the apiarist, or person who keeps bees, was usually termed a lazy person and adopted beckeeping because the bees work for him for nothing and board themselves, and no effort was required on his part. It would seem that there may be some truth in this, when we see a beekeeper walk out among his hives on a fine day, just at this most critical period, and, finding bees flying nicely from every hive, decide in his mind that the bees are all right and in fine condition, and turn away and leave them without touching a bive. No time in the whole year is it so important to find the condition of every hive as at this time. Nor does it require our attention at this time only, but from this period on until entirely out of the winter, with every colony in first class condition and as strong as we can get them in numbers, with a good supply of stores for both present and future use until the honey harvest

On inspection in early spring thus two important things to look after are first to see if a queen is present in the hive and in evidence of usefulness, and to look for brood in the combs. Nearly every good queen will now have considerable brood in the combs if the colony is fairly strong, and the presence of brood is all the

XYNE QUININE

Are the Best remedy for Colds, Head-ache and Grippe. They break up a Cold quickly, move the bowels gently, carrying off fever and other poisonous matter from the system. Guaranteed to cure. Try them. 25 cents. For sale by

J. A. STANTON, Druggist

evidence you require to know if the queen is there. The second important thing is to see if they have stores sufficient to at least carry them along a month or so later, or until warm weather predominates, so they can be fed sirup. Better not be hasty about feeding sirup thus early, but if a colony is nearly ashore for food, give them eandy to carry them on a little later. When opening hives on this occasion during March be very careful to place every frame of comb back in the hive in just the same place and in the same position it formerly occupled. Close up the hives very carefully and securely and leave no eracks or openings for the next severe cold spell to cause your labors to be a damage rather than a benefit to the

queen, it may be united with another at this time if the weather is very fine, but it is usually better to just close up the hive and let it remain so until nearer the opening of spring. But keep a lookout for robbers, for they will surely find it sooner or later.

If a colony is found to have lost its

Presentation of Account. C. H. BAILEY'S ESTATE.

C. H. BAILEY'S ESTATE.

STATE OF VERMONT, Caledonia District, ss. In Probate Court, held at the probate office in St. Johnsbury, in said district, on the 15th day of February, A. D. 1901.

George W. Bailey, Executor of the last Will and Testament of Charles H. Bailey late of Ryegate in said District, deceased presents his administration account for examination and allowance, and makes application for decree of distribution and partition of the estate of said deceased.

decree of distribution and partition of the estate of said deceased.

Whereupon, it is ordered by said court, that said account and said application be referred to a session thereof, to be held at the Probate office in said St. Johnsbury, on the 12th day of March, A. D. 1901, for hearing and decision thereon: And it is further ordered that notice hereof be given to all persons interested, by publication of the same three weeks successively in the Caledonian, a newspaper published at St. Johnsbury, previous to said time appointed for hearing, that they may appear at said time and place, and show cause, if any they may have, why said account should not be allowed and such decree account should not be allowed and such decree

made By the Court, Attest: WALTER P. SMITH, Judge.
